EDUCATION

B.Sc. Artificial Intelligence

Deggendorf Institute of Technology

Sep 2024 – Mar 2028

Deggendorf, Germany

- **Scholarship:** DAAD - Deutscher Akademischer Austauschdienst
- **Focus on:** Statistics, Natural Language Processing, AI Programming, Data Structures & Algorithms, Quantum Computing, Imaging in astronomy, Databases, Assistance Systems, Mathematics and Computational Logic.

High School Graduation

High School Dona Luísa de Gusmão

Sep 2021 – Jun 2024

Lisbon, Portugal

- **Honours:** 3x *Quadro de Honra* (Honor Roll) recipient.
- **Focus on:** Mathematics, Physics, Chemistry, Descriptive Geometry, and Computer Science.

EXPERIENCE

Student Assistant (Sweeper 247)

Deggendorf Institute of Technology

Jan 2026 – Present

Deggendorf, Germany

- Developing resilient sensor data pipelines for vibration monitoring through MPU6050.
- Performing hardware–software integration across ESP32, Sensors and UI.
- Designing mechanical prototypes using Autodesk Fusion 360.

Tutor

Deggendorf Institute of Technology

Sep 2025 – Oct 2025

Deggendorf, Germany

- Guided interdisciplinary student teams in technical documentation, emphasizing clarity.
- Facilitated structured project execution and collaborative problem-solving.

SELECTED PROJECTS

TinyML Environmental Monitoring

Academic Project

Mar 2026

- Built an end-to-end classification pipeline on ESP32-S3 hardware.
- Implemented real-time sensor fusion and TF Lite model optimization, featuring on-device inference with a live web telemetry dashboard.

Clinical Diagnostic Risk Assessment

Academic Project

Jan 2026

- Developed a multimodal ML application for automated diabetes screening.
- Optimized a Random Forest model achieving 97% accuracy, tuned for high recall.

NLP Legal Query Assistant

Jul 2025

Academic Project

- Engineered an intent-based chatbot for German traffic law queries deployed on Azure, utilizing NLP classification and structured legal response handling.

Smart Park Solution (Bavaria Summer School)

Jul 2025

Lead Developer

Bavaria, Germany

- Addressed urban parking scarcity by designing and prototyping a community-focused "Smart Park" system relying on intelligent data collection.

CanSat Atmospheric VOC Monitor

Jan 2024 – May 2024

Payload System Developer

Lisbon, Portugal

- Designed a payload system for aerial detection of volatile organic compounds (VOCs).
- Managed sensor calibration and data logging while adhering to strict aerospace standards.

TECHNICAL SKILLS

Programming:	Python, C++, Java, JavaScript, PostgreSQL
AI & Data:	Scikit-learn, TensorFlow, Pandas, Matplotlib, Seaborn
Hardware & Embedded:	Arduino, ESP32, Raspberry Pi, PlatformIO, Kicad
Tools & Cloud:	Git, Azure, Streamlit, FastAPI, Autodesk Fusion 360

CERTIFICATIONS

Machine Learning & AI:	Kaggle Deep Learning, Kaggle Machine Learning
Software Engineering:	Scientific Computing with Python, Advanced Programming in C++

LANGUAGES & HOBBIES

Native & Bilingual:	Bangla (Native), English (C1)
Professional:	Portuguese (B2)
Basic:	German (A2), French (A1), Spanish (A1)
Hobbies:	3D Design, Music, Reading and Sports.

Deggendorf, May 10, 2026
